

I do not feel that the FCC should implement any propoal that would lessin Indiana's Telephone Privacy law and the protections from unwanted calls that it provides. We once were plagued by unwanted calls for credit card offers, cruise specials, siding, windows, you name it. Having my name on the "do not disturb/call" list has reduced these annoyances from about 12 a week to only one or two. I feel that in this day and age, the importance of family and quality time with them (without unnecessary interrption) simply can not be underestimated. Please don't do anything to take this quiet time away from America's most important rescouces - our families!

Thank you for your time,

Kelly Goodall
